USEFUL HELPERS

141

+ A well-functioning extended range

- ▶ Extremely large selection in standardised and non-standardised, metric (mm), imperial (AF) and Whitworth (W) sizes
- ▶ Top-grade industrial quality for the hardest of continuous use
- ▶ Available singly or in practical sets or modules
- ▶ Customised manufacturing, designs and types on request

+ Durable and for high loadings

- ▶ For heavy continuous use and safety in everyday work
- ▶ High bending strength - GEDORE quality spanners do not fracture or splinter when overloaded, but deform under incorrect use, therefore posing a lower risk of injury to the user
- ▶ Comfortable to hold due to ergonomic profiles without sharp edges
- ▶ Secure grip even with oily hands
- ▶ Non-glare look thanks to matt chrome-plating

++ Precision, correct measurements and perfect fit

- ▶ The most important requirements for harmless and safe work
- ▶ Complete transmission of available torque
- ▶ Long life of nut and bolt
- ▶ Profiles easy on the bolt heads (UD, jaw, hexagon)
- ▶ Minimum production tolerances ensure that spanners fit perfectly on bolts

Everything safely under control

- ▶ Use of the very best raw materials, state-of-the-art machinery and environmentally-friendly production processes
- ▶ Tools without chrome VI have been a given thing for several years
- ▶ Our tool experts guarantee precision-like processing and permanent development
- ▶ Unique manufacturing processes and special tool treatment for optimum results
- ▶ Stringent quality checks after each production step ensure a constantly high level
- ▶ Professional service through to development of special customised tools

THE PRODUCTION

OF A SPANNER

From the tool blank to the final product. Quality Comes into Existence - Step by Step.

GEDORE

1 ... High-Quality Steel 31CrV3

Highly-efficient eccentric presses cut the blank for an open-ended spanner from high-quality flat steel.

3 ... Thermally Hardened

Using a special thermal treatment, achieves maximum hardness - and a guarantee of long service life.

2 ... Hot Forging Process

In the pusher furnace, the blank is heated to the exact pre-selected temperature and enters the forge while still red hot. The steel is given its form under the multi-ton blows of a drop hammer.

4 ... Precisely Ground

The jaws of the spanners are given their exact dimensions only after the hardening process. For this purpose, a high-tech grinding robot has been developed especially for this operation.

5 ... Carefully Smoothed

Any corners and edges still remaining are smoothed off by vibratory grinding, until the heads and shaft are absolutely free of burrs. The heads are additionally ground.

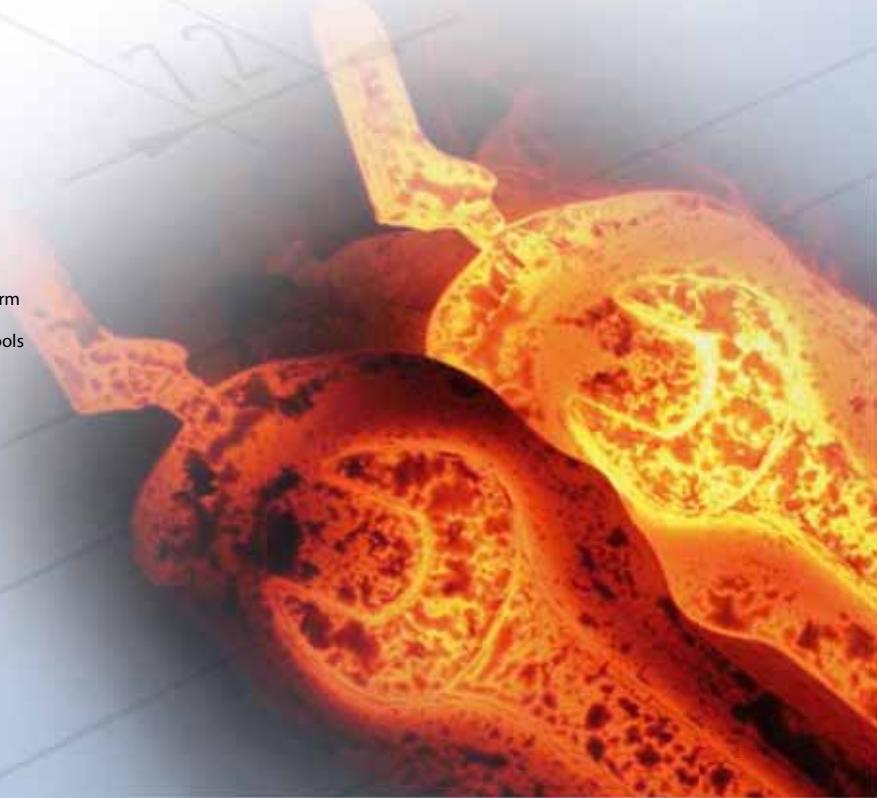

6 ... Extensively Treated

The extensive electroplating gives the spanners an effective surface protection and a perfect appearance. During this process, an efficient recycling plant ensures that the environment will not be affected.

+ Why matt chrome-plated?

- Non-glare look
- Non-slip surface for a firm grip even when hands are dirty
- Double protection against corrosion A nickel layer is applied before chrome-plating. Nickel and chrome: these two layers combine to form optimum protection against corrosion.
- Chrome chips are practically unheard of on matte chrome-plated tools
- The matte chrome-plated GEDORE finish retains its elegant look for decades

SPANNER MATRIX

Type / Series		Special		mm	"AF	Whitw.		
Combination spanner				3 → 80 mm	1/16" AF → 3.1/4"AF	1/8" W → 3/4"W

Deep ring spanner				33 → 105 mm	7/8"AF → 4.1/8"AF	9/16"W → 2.1/4" W		
308				13 - 95 mm	1.3/16"AF - 3.1/8"AF	9/16"W - 1.3/8" W		
No. 2A				22 - 105 mm	7/8"AF - 4.1/8"AF	9/16"W - 2.1/4" W		

Additional info:

- GEDORE non-glare, matte chrome-plated, 31CrV3
- Various standard individual spanners compiled as practical sets
- Supplied in metal case, module or other holder

➤ See respective product in catalogue section for DIN standards and info on material quality

➤ Some spanner ranges are hexagonal instead of having a UD profile in the smallest ranges.

THE KEY TO SUCCESS

Hi-tech for the exact rated size

Open-ended spanners have been made since the dawn of technology. But the continued use of traditional tools does not mean that they are still manufactured by conventional production processes. Tried and tested production stages are subject to continuous development by our workforce.

Where modern technology can improve the quality, it is used. GEDORE grinds the spanner jaws to the exact rated size, using a high-tech grinding machine. Perfect fit is the most important requirement for non-damaging and safe work.

- Precision dimensions ensure secure nut and bolt grip
- Long life of nut and bolt
- Complete transmission of available torque
- Top quality for better safety

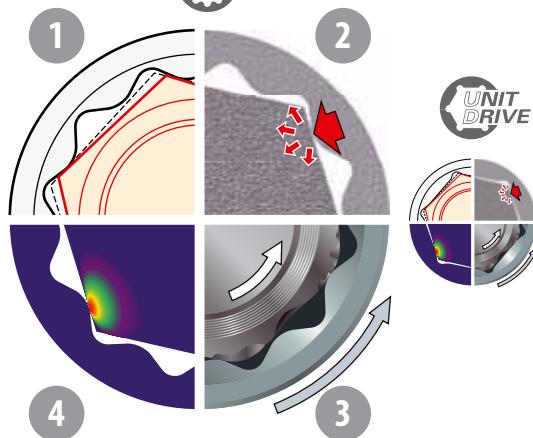

UNIT DRIVE PROFILE (UD PROFILE) protects bolt heads

The GEDORE UNIT-DRIVE profile prevents bolt heads from "spinning" thanks to a wave form without pointed or sharp edges. The enlarged circular contact surfaces displayed by GEDORE tools ensure safe torque transfer with a consistent effect on the bolt head.

The minimised notch effect achieved as a result prevents damage to the bolt head profile - for extra safety as this prevents slipping and spinning, even where bolt heads are already damaged.

GEDORE UNIT-DRIVE profile

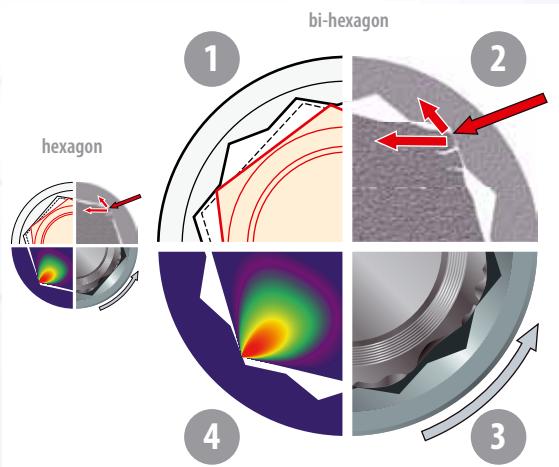

1 Larger contact surfaces ensure safe grip even on bolt heads whose dimensions do not conform with the tolerance.

2 Even distribution of force across the flats of the bolt heads. This means that the reduced notch effect prevents the bolt head from spinning.

3 Even worn bolt heads are safely released thanks to this gentle torque transfer - without the tool slipping.

4 Optimum distribution of force enables transfer of up to 20% higher torques.

Standard profile

1 The smaller contact surface reduces the grip. Safe torque transfer is no longer possible and can represent a danger.

2 The sharp edges increase the notch effect on the bolt head. The profile is destroyed.

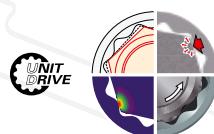

3 Spinning bolt head profiles can no longer be released as the torque is no longer transferred - the tool starts to slip.

4 Strong force exerted on the tip of the bolt head profile. Spot pressure deforms the bolt head.

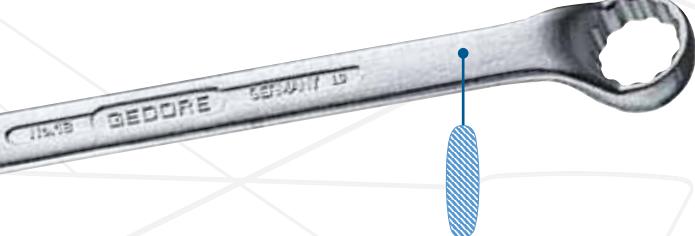

No. 1 B "The strong all-rounder"

- Carefully forged and professionally machined.
- Slim ribbed open end for added strength guarantees maximum torques.
- Jaw: ground precisely to exact nominal size for optimum contact areas.
- Ring: 10° offset from shaft, with UD profile for gentle transmission of force.
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury.
- Overloading indicated by deformation.
- Non-glare matt chrome-plated finish.
- The offset ring ensures a better grip on deep-seated or inset nuts or bolts.
- Top-grade industrial quality for the hardest of continuous use.

Spanner sizes:

- Metric dimensions: 5 - 80 mm
- Imperial dimensions: 1/4" - 3 1/4"
- Whitworth dimensions: 1/8W - 3 1/4W

mm

No. 7 "Slim line"

- Carefully forged and professionally machined:
- Slim jaw and jaw walls make this spanner lighter overall
- Jaw: ground precisely to exact nominal size for optimum contact areas
- Ring: 15° offset from shaft, with UD profile for gentle transmission of force
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury
- Overloading indicated by deformation
- Secure grip thanks to hollow shaft - very ergonomic and handy
- Non-glare matt chrome-plated finish
- Designed for universal use
- Top-grade industrial quality for the hardest of continuous use

7 XL "Long and extra strong"

- Carefully forged and professionally machined:
- Slim jaw and jaw walls make this spanner lighter overall
- Jaw: ground precisely to exact nominal size for optimum contact areas
- Ring: 15° offset from shaft, with UD profile for gentle transmission of force
- Extra-long shaft for deep applications
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury
- Overloading indicated by deformation
- Secure grip thanks to hollow shaft - very ergonomic and handy
- Non-glare matt chrome-plated finish
- Ideally suited to extremely tight, high-torque screwed joints
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

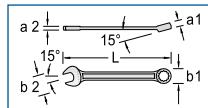

Metric dimensions: 7 - 46 mm

7 XL

COMBINATION SPANNER with same size each end, extra long

- Similar to DIN 3113
- Ring 15° offset from shaft, with UD profile
- Shaft made in girder pattern
- GEDORE vanadium steel 31CrV3, chrome-plated

**The revolution
A perfect collection**

ALL THE BENEFITS...

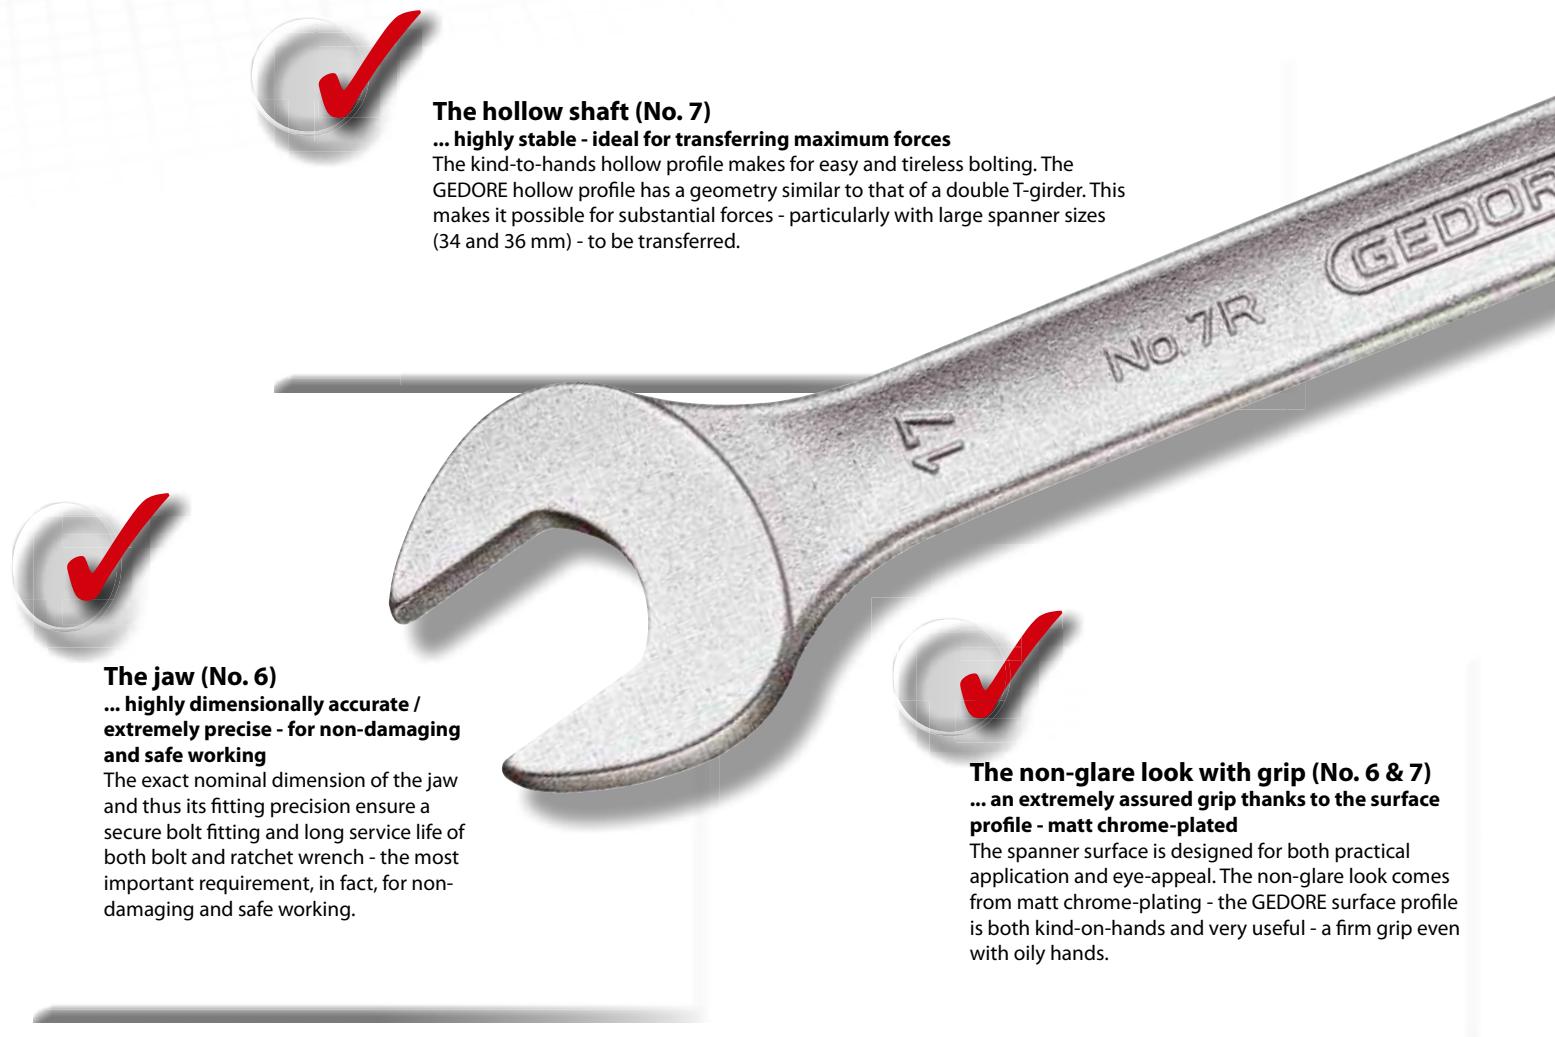

TRIED-AND-TESTED NO. 7

... HAVE BEEN COMBINED INTO THESE RATCHET WRENCHES 7 R + 7 UR:

**Schlüsselknarre®
R-Serie**

7R
=&
7UR

The hollow shaft (No. 7)

... highly stable - ideal for transferring maximum forces

The kind-to-hands hollow profile makes for easy and tireless bolting. The GEDORE hollow profile has a geometry similar to that of a double T-girder. This makes it possible for substantial forces - particularly with large spanner sizes (34 and 36 mm) - to be transferred.

The jaw (No. 6)

... highly dimensionally accurate / extremely precise - for non-damaging and safe working

The exact nominal dimension of the jaw and thus its fitting precision ensure a secure bolt fitting and long service life of both bolt and ratchet wrench - the most important requirement, in fact, for non-damaging and safe working.

The non-glare look with grip (No. 6 & 7)

... an extremely assured grip thanks to the surface profile - matt chrome-plated

The spanner surface is designed for both practical application and eye-appeal. The non-glare look comes from matt chrome-plating - the GEDORE surface profile is both kind-on-hands and very useful - a firm grip even with oily hands.

The ratchet (U-20)

... extra flat and sturdy - ideal for tough use and even at hard-to-reach areas

Extremely compact and highly efficient - for quick deployments and also under cramped conditions. The tried-and-tested U-20 ratchet technology incorporated in an extremely flat ring head ensures efficient ratcheting work - For both loosening and fast tightening. The sturdiness of the ratchet wrench is very much down to the number of teeth intentionally selected. The GEDORE pawl geometry optimises the actually large working angle occasioned by a small number of teeth.

The UD profile (No. 7)

... extremely easy on the bolt heads with the force ideally transferred

The wave form of the profile enlarges the spanner grip in every case - even with bolts whose dimensions are outside the tolerance range. Even distribution of pressure permits the maximum force to be applied.

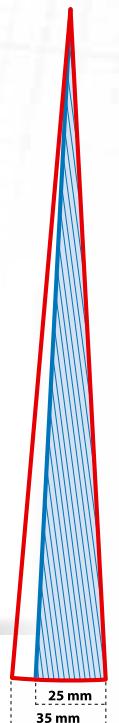

7 UR

The working angle

... extremely rapid deployment even in very confined spaces thanks to its very small working angle

With an immediate meshing mechanism, GEDORE has managed to reduce the play between pawl and locking insert to practically nothing. This refinement of the ratchet technology has produced a very small, yet effective working angle. This means a reduction to a minimum of the spanner dead operating angle. The spanner starts off with active power where others are still at idle.

GEDORE 25 mm*

conventional spanner 35 mm*

25 mm	35 mm
-------	-------

for 19 mm

Long life cycle

...precise and reliable, environment and maintenance-friendly

The fact that the ratchet wrench can be serviced underpins its sustainability. Even after any instance of incorrect use (e.g. given considerable soiling, overstressing or moisture...) the ratchet wrench can be quickly made operable. Unscrew, slight re-greasing, screw down - and then continue to reliably undo the bolts.

THE PRODUCTION OF A RATCHET WRENCH

From the tool blank to the final product

Quality Comes into Existence - Step by Step "Made in Germany"

1 ... high-quality steel 31CrV3, ideal for hand tools

Highly-efficient eccentric presses cut the blank for a ratchet wrench from high-quality flat steel. The coming shape, powerful heads and slim shaft can even be recognised at this stage.

2 ... hot forging process

In the forging furnace the blank is heated to the exact pre-selected temperature and enters the forge while still red hot. The steel is given its form in the die under the multi-ton blows of a drop hammer. Any excess steel at the sides is then de-burred.

3 ... machined

The ratchet head is brought to the precise dimension in a CNC machining centre.

4 ... tempering

A special thermal treatment involving inert gas provides the tool with its extreme hardness and toughness - indispensable for a particularly long service life. Hardening ensures the required hardness and the annealing which follows imparts that toughness to the ratchet wrench body. Hardening and annealing together are referred to as tempering.

5 ... precisely ground

The jaws of the spanners are given their exact dimensions only after the hardening process. For this purpose, a high-tech grinding robot has been developed especially for this operation.

6 ... smoothed in a kind-to-hands manner

After grinding has produced a clean-cut, burr-free outer surface for our ratchet wrench bodies, any corners and edges still remaining are smoothed off by vibratory grinding until the head and shaft are likewise absolutely clean-cut and burr-free. The heads are additionally ground. This gives rise to GEDORE's kind-on-hands haptics.

7 ... extensively treated

The extensive electroplating gives the spanners an effective surface protection and a perfect appearance. Nickel-plating provides the ratchet wrench body with optimal corrosion protection and the non-glare finish comes from high-grade matt chrome-plating.

THE PRODUCTION OF A RATCHET INSERT

8 ... high-quality steel brought precisely into shape

High-quality GEDORE special hardened and tempered steel brought precisely into shape on the most up-to-date CNN machining centres.

9 ... unmistakable profile

The unmistakable, easy-on-bolts Unit Drive Profile (UD) is precisely reamed to size on highly-efficient reaming presses. Tempering is followed by the screw insert being manganese-phosphated. It protects from corrosion and lessens friction-induced wear.

MERGING

10 ... marriage

Ratchet wrench body, screw insert, cap and mechanisms are assembled. (Technicians traditionally refer to this as the marriage process.) This is accompanied at the same time by the functional check. Coming into play very much here is the knowledge and extensive track record of our staff. And ready is the GEDORE ratchet wrench - made by GEDORE - made in Germany!

GEDORE

7 R

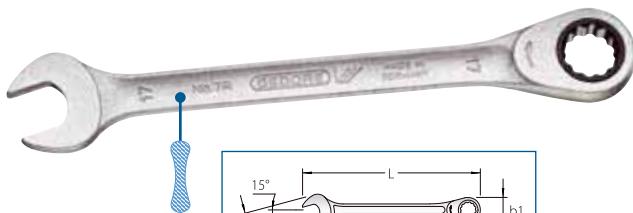

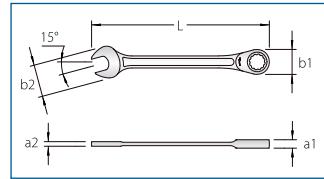

COMBINATION RATCHET SPANNER

- With same size each end
- Flat pattern
- UD profile
- Working angle: 7° from 8 to 15 mm, 6° from 16 to 27 mm and 5° from 30 to 36 mm
- For ratchet loosening and fast tightening
- High torque transfer
- Hollow profile comfortable to hold
- Warp-resistant geometry with double T-girder effect
- GEDORE vanadium steel 31CrV3
- Non-glare look thanks to matt chrome-plating, locking insert and pawl manganese-phosphated
- Hot forged
- Jaw exactly ground to spanner size
- Tried-and-tested GEDORE technology combined anew: spanner jaws of classic No. 6, stable hollow shaft of No. 7 and refined mechanism of the U-20 ratchets
- In combination with adaptor 7 RA or 7 RB (order separately) the spanner 7 R can be used as a (bit) ratchet

Spanner sizes:

- Metric dimensions: 8 - 36 mm
- Imperial dimensions: 1/4" - 1 1/4"

OPEN ENDED SPANNERS

6 "Strong and accurate"

- Carefully forged and professionally machined:
- Powerful jaws: ground precisely to exact nominal size for optimum contact areas
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury
- Overloading indicated by deformation
- Secure grip thanks to slim profile shaft
- Non-glare matt chrome-plated finish
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 4 x 4.5 - 55 x 60 mm
- Imperial dimensions: 1/4" x 5/16" - 2 1/4" x 27/16"
- Whitworth dimensions: 1/8 x 3/16 W - 7/8 x 1 W

Optional accessories

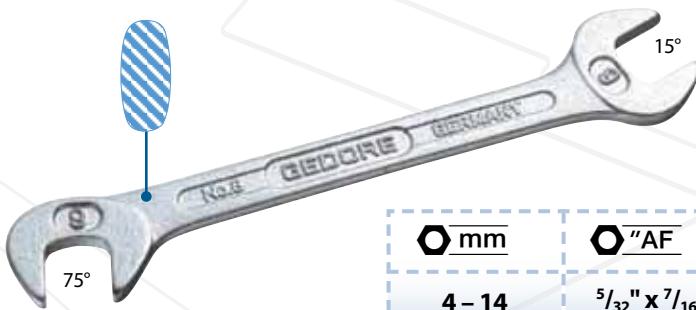

8 "Small"

- Carefully forged and professionally machined:
- Flat heads: ground precisely to exact nominal size for optimum contact areas
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury
- Overloading indicated by deformation
- Secure grip thanks to slim profile shaft
- Non-glare matt chrome-plated finish
- Offset head for difficult applications
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 4 - 14 mm
- Imperial dimensions: 5/32" - 7/16"

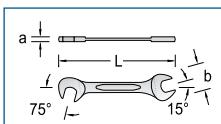

mm

60 S**ADJUSTABLE WRENCH open end**

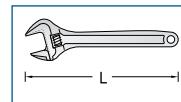

- Acc. to DIN 3117 Form A, jaw set at 15°
- Swedish pattern, roller with left-hand thread
- With scale
- The protected mechanism and additional striking face allow light blows to be applied without impairing the function of the wrench
- Comfort grip from the GEDORE Design Studio
- Grip recess ensures secure hold - even with greasy hands
- Plastic handle (versions JC and JP) for fatigue-free working
- Hanging hole
- Version C nickel and chrome plated, head ground
- Version P manganese phosphated, head ground
- Version JP and JC complete with plastic handle

DOUBLE ENDED RING SPANNERS

2 "Offset"

- Carefully forged and professionally machined:
- Ring: thin-walled, 5° deep offset from shaft, with UD profile for gentle transmission of force
- High bending strength - does not fracture or splinter when overloaded, thus minimising the risk of injury
- Overloading indicated by deformation
- Non-glare matt chrome-plated finish
- Specialist for extremely deep or inset nuts
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 5.5 x 7 - 85 x 90 mm
- Imperial dimensions: 1/4 x 5/16" - 3 x 3 1/8"
- Whitworth dimensions: 1/8 x 3/16 W - 1 7/8 x 2 W

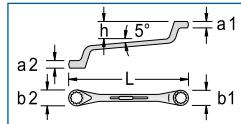

mm	"AF"	Whitw.
5.5 x 7	1/4" x 5/16"	1/8 x 3/16"
85 x 90	3" x 3 1/8"	1 7/8 x 2"

2

DOUBLE ENDED RING SPANNER

- Rings deep offset, strong but thin walls
- Acc. to DIN 838, ISO 3318, ISO 1085, ISO 10104
- GEDORE vanadium steel 31CrV3, chrome-plated, polished rings
- * not standardised

RING SLOGGING SPANNER

- For very heavy-duty work
- Acc. to DIN 7444
- Up to length 435 mm chrome-vanadium steel 31CrV3, above 480 mm from C35
- Special sizes available on request
- * not standardised
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 22 - 230 mm
- Imperial dimensions: 7/8" - 7 1/2"
- Whitworth dimensions: 9/16 W - 3 3/4 W

306 G

RING SLOGGING SPANNER DEEP OFFSET

- For very heavy-duty work
- To use with club hammer or pneumatic hammer for tightening or loosening
- Hot forged, sandblasted
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 27 - 115 mm
- Imperial dimensions: 1 1/16" - 4 5/8"
- Whitworth dimensions: 9/16 W - 2 W

DEEP RING SPANNERS

"STRONG"

308

DEEP RING SPANNER straight pattern

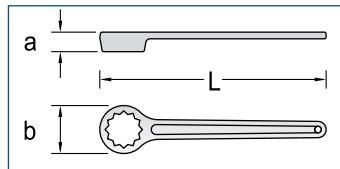

- Acc. to DIN 3111
- In heat-treated steel as per EN 10083, shotblast finish
- Further sizes available on request
- * not standardised
- Top-grade industrial quality for the hardest of continuous use

Spanner sizes:

- Metric dimensions: 13 - 95 mm
- Imperial dimensions: 13/16" - 3 1/8"
- Whitworth dimensions: 9/16 W - 1 3/8 W

MULTI FITTING KEYS

45 P

PROFI-KEY UNIVERSAL

- Key for opening and closing of technical shut-off systems e.g. air-conditioning, revision systems
- For the outdoor areas - locking of bins or waste containers, and street lamp lids etc.
- With bit insert: slotted head 1.0 x 7 mm and cross-slotted head PH 2 with adapter for 1/4" bits on securing chain
- 5 mm square for radiator valves
- Stepped key with 6, 7, 8, 9 mm square
- Female square 5, 6, 7-8 mm
- Female three-square 9 mm
- Dimensions: 90 x 62 mm
- Zinc die-casting

Code	No.		
2190117	45 P	80	1

45 S

MULTI FITTING MASTER KEY UNIT

- Key for opening and closing of master cabinets, switch panels, technical shut-off systems e.g. air-conditioning, revision systems
- For the outdoor areas - locking of bins or waste containers, and street lamp lids etc.
- Supplied with bit insert: slotted head 1.0 x 7 mm and cross-slotted head PH 2 with adapter for 1/4" bits on securing chain
- 5 mm square for radiator valves
- Female square 5, 6, 7-8 mm
- Female three-square 9 mm
- Two-way-key 3-5 mm
- Dimensions: 72 x 72 mm
- Zinc die-casting

Code	No.

**45 U****MULTI FITTING KEY UNIVERSAL**

- For all usual technical shut-off systems
- 1 tool for 9 applications
- 8 different master cabinet shut-off systems and 5 mm square for radiator valves
- Flat construction due to space-saving swivel mechanism
- Square locking: 5, 6, 7-8, 9-10 mm
- Three-edged locking: 7, 8-9, 10-11 mm
- Two-way-key 3-5 mm and half-moon locking 6 mm
- Securing chain with snap-hook
- Dimensions: 95 x 95 mm
- Zinc die-casting

Code	No.	Ø	Box
2294826	45 U	204	1

45 B**MULTI FITTING KEY CONSTRUCTION**

- Especially suitable for the construction sector
- Space-saving, double swivel mechanism
- Stepped key with 6, 7, 8, 9 mm square
- Female square 5, 8 mm
- Female three-square 9 mm
- Magnetic bit adaptor 1/4", supplied with one bit PH 2
- Screwdriver function with retaining clip
- Length: 145 mm

Code	No.	Ø	Box
2294818	45 B	120	1

**45 E****MULTI FITTING KEY ELECTRO**

- For all usual electric master cabinets
- Space-saving, double swivel mechanism
- 5 mm square for radiator valves
- Female square 5, 6, 7-8 mm
- Female three-square 9 mm
- Two-way-key 3 - 5 mm
- Magnetic bit adaptor 1/4", supplied with one bit PH 2
- Screwdriver function with retaining clip
- Length: 145 mm

Special manufacture

- As a group that manufactures hand tools and industrial equipment, we aim to solve your tool problems!
- Our Technical Field Service will work with you to find solutions.
- Customised products are in good hands with us.
- In-house design, tooling construction and manufacture ensure smooth order handling - Everything from a single source!

(Examples for special manufacture)

PRACTICAL HELPERS

636

PLUS-FORM HANDLE

- Push-on handle for spanners
- Designed for use with No. 4, 6, 7, 894, 895 sizes 13 - 22 mm
- Where high hand force is needed to turn the spanner, the ergonomic Plus-Form handle distributes the force evenly over the hand
- This avoids painful pressure points in the palm
- The special design of the holder and counter-holder safely secures the spanner in the handle
- Ideal for removing tight bolts
- The Plus-form handle extends short spanners, increasing the applied force!
- Practical hanging hole
- Made from scratch-proof, sky-blue powder-coated sheet steel

Code	No.	$\frac{1}{2}$	$\frac{1}{4}$
1999079	636	100	1

637

RETAINING CLIP FOR NUTS

- With magnetic holder
- Suitable for open ended and flat ring spanners size 10-19 mm

Code	No.	$\frac{1}{2}$	$\frac{1}{4}$
1834150	637	6	1

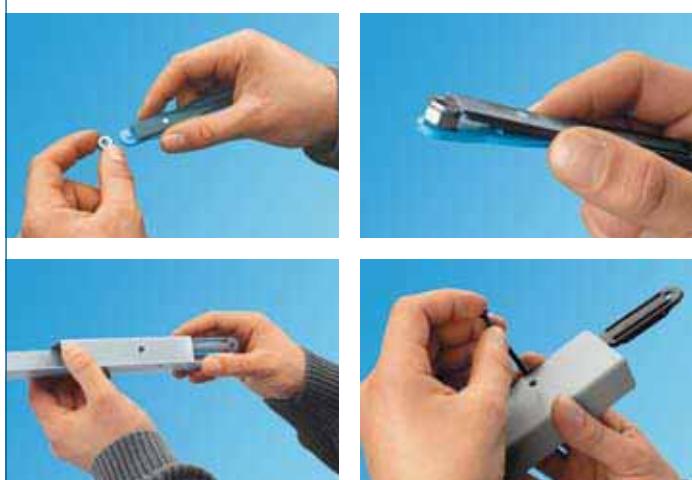

639

COMBINATION HOLDING TOOL

- Small helper to hold nuts and washers in barely accessible places
- For thread sizes from M3 to M8

Code	No.	L	W	H	$\frac{1}{2}$	$\frac{1}{4}$
1640852	639	110	19.2	9.7	16	1

649

MINIATURE LED LAMP with swivel end in plastic box

- With swivel end, magnetic
- Supplied with batteries in black plastic box, 106 x 60 x 24 mm

Code	No.	$\frac{1}{2}$	$\frac{1}{4}$
1646451	649	71	1
